## ENERGY EFFICIENCY

Re-usable Shopping Bag

Instead of using plastic bags at the grocery store, save with a re-usable shopping bag. These are VERY popular right now. Items you can use for this production are 520ADJ Binder (Clean Finish or Raw Edge) and 672/672A Strap Handle Folders.

Lined Curtains

Save money and energy by hanging lined curtains to help keep the heat or cold from escaping at your windows.

Use a 557 Hemmer, 772SF Lap Seam Folder (semi-fold), and 672/672A Strap Handle Folders for the production of these curtains.

Tote Bag

Having a tote bag is always handy. You can use it for so many different things.

Items needed are 714 or 715 Zipper Folder, 672/672A Strap Handle Folder, 455-AorB Clean Finish Binder, and 739 Welt Trim Folder.

Mesh Laundry Bag

A lot of bags can be made from eco-friendly products. Some products used for producing this mesh laundry bag are the 631 Clean Finish Cord Hemmer, 632 Raw Edge Cord Hemmer, and 520ADJ Binder (available complete with parts).

Awning

The awning really helps to keep out the heat with the shade provided and prevent UV rays from entering.

Using 493 Raw Edge Zig-Zag Binder for acrylic, 772 Lap Seam Folder, and a 588 Clean Finish Hemmer for Pocket, you can make these easily.

Greenhouse

Keep your plants thriving throughout the winter time with the greenhouse.

You can make these with a 455-AorB Binder Set, 780-10 Lap over Guide for Panels, and a 588 Clean Finish Hemmer. *Specialty parts for any of these items can be made easily.*
